Tēnā koe Minister Woods

ENGINEERS REGISTRATION BILL

Following the recent Cabinet reshuffle and notice from the Prime Minister that the legislative agenda is under review, we ask you and Cabinet to continue to prioritise the progression of the Engineers Registration Bill. We have been encouraged by the progress of the Bill over this term and strongly support its timely introduction to the House. The Bill has been a very long time in coming and has created considerable uncertainty for the profession. We are confident the Bill will support improved outcomes for the public. Progressing the Bill will also strengthen the trust of the engineering profession in the Government.

Thank you for your support.
